

## Patient Priorities Care Consult Scripts

### **If referring patient, frame the question/request around patient priorities:**

- General request to align recommendations with patients' priorities: *"Please consider this patient's health outcome goals ( fill in goals ) and health care preferences ( fill in preferences for or against relevant care options ) when evaluating and recommending diagnostic tests, procedures, and medications"*
- Consult to address a specific issue: *"Given this patient's conditions and health trajectory and her (his) health priorities which are (fill in goals and preferences for or against relevant care options), please consider the following suggestions for (fill in suggestion medication, test, procedure). I am happy to discuss more why I think this is appropriate for this patient".*
