**Care Alignment Strategies:**  
[decisionguide.patientprioritiescare.org/](http://decisionguide.patientprioritiescare.org/)

## STEPS: Align Care with Health Priorities

- Review the patient's health priorities template
- Begin encounters with *“What one thing do you most want to focus on that you think is keeping you from achieving your health goal (from Priorities Template)?”*
- Follow the care alignment strategies and troubleshooting for patient priorities-aligned decision-making
- Document and communicate patient priorities

## STRATEGIES: Use Patient's Priorities...

- To consider if current & potential care is consistent with health outcome goals & care preferences
- To focus for communication with the patient
- To guide serial trials to start, stop or continue interventions
- To align decisions with priorities, especially where differing perspectives exist
