

Official Boilerplate Language for Patient Priorities Care

[Patient Priorities Care \(PPC\)](#) offers evidence-based tools and resources to help patients, care partners, and clinicians focus decision-making and healthcare on what Matters Most: patients' own health priorities. Patient Priorities Care is suitable for any patient, but especially older adults managing multiple chronic conditions. PPC is a Yale research project from the Department of Internal Medicine's Section of Geriatrics, led by co-creator Mary Tinetti, MD, who is the principal investigator on the grant. PPC is now focusing efforts on spreading awareness and training clinicians across the U.S.
